

Blog generation Module – User Manual v1.0

1. Login page

The user can log in using valid credentials.

- **Access URL:** <https://xfactr-web.rehabmart.com/auth/login>
- **Username:** <name>@rehabmart.com
- **Password:** Welcome@123 (this password is default and can be reset after login)

2.Home page

After successful login, the user is redirected to the **Home Page**, also referred to as the **Dashboard**.

Key Features:

- Displays a **summary of blog generated** and their current status (e.g., *Pending, Review, Submitted*).
- Quick access to generate new blogs using the **Upload** button.
- View recent activity or status of ongoing reviews.

The screenshot shows the makez.ai dashboard for user 'Prakruthi'. The main section is 'Recent Contents', which is a table with the following data:

Name	Document No.	Extracted By	Status	Blog Link	Completed On
Hush Sleep Strips - 32/Pack: Your Solution for...	N/A	prakruthi p	Review	-	14/03/2026 15:30:39

Carry Bag for AirSense Ti: The Ultimate Travel ...	N/A	prakruthi p	Review	-	14/03/2026 15:30:04
Hush Sleep Strips - 32/Pack: Your Solution for...	N/A	prakruthi p	Review	-	14/03/2026 13:43:27
Bleep Eclipse Starter Kit - Complete Halo Clea...	N/A	prakruthi p	Review	-	14/03/2026 13:43:11
LifeSpark Smart Check O2 Analyzer: Professio...	N/A	prakruthi p	Review	-	14/03/2026 13:43:09
Motif Roam Double Electric Breast Pump and ...	N/A	prakruthi p	Review	-	14/03/2026 13:43:01

Below the table are four product overview cards:

- CGU - Product Overview**: Submitted 11, Extracted 98, Total 127. Buttons: Edit Prompt, Create, Upload.
- CGU - Product Comparison**: Submitted 0, Extracted 12, Total 13. Buttons: Edit Prompt, Create, Upload.
- CGU - Product Roundup**: Submitted 4, Extracted 8, Total 12. Buttons: Edit Prompt, Create, Upload.
- Andrea Test Template**: Submitted 0, Extracted 0, Total 0. Buttons: Edit Prompt, Create, Upload.

On the right, the 'Quick Summary' shows: 133 Total Documents, 15 Processed Documents, 118 Ready to Review, 0 In Progress, 0 Invalid File, and 0 Failed File.

3.File Upload

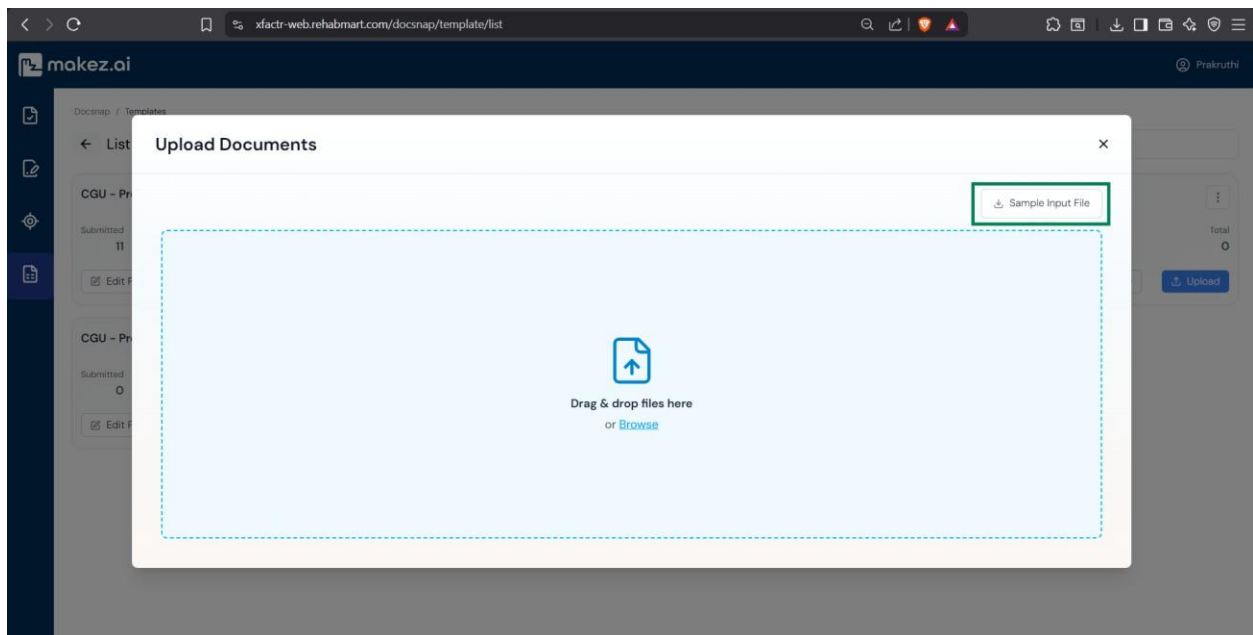

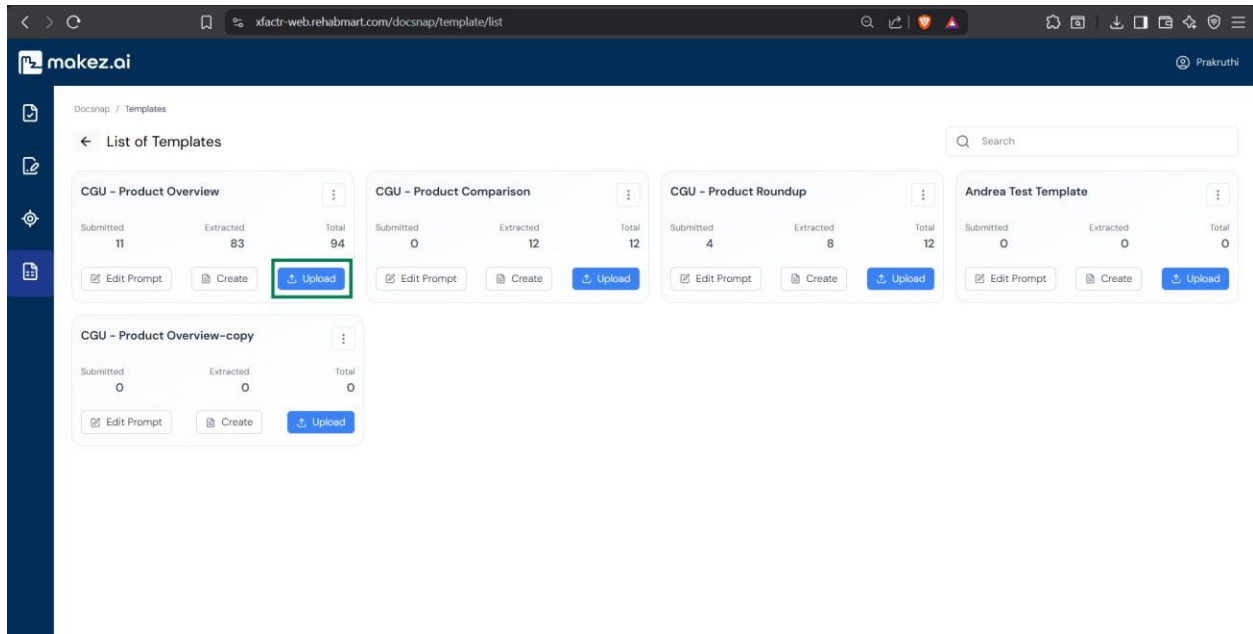

Here, users can upload files for processing and generating blog content.

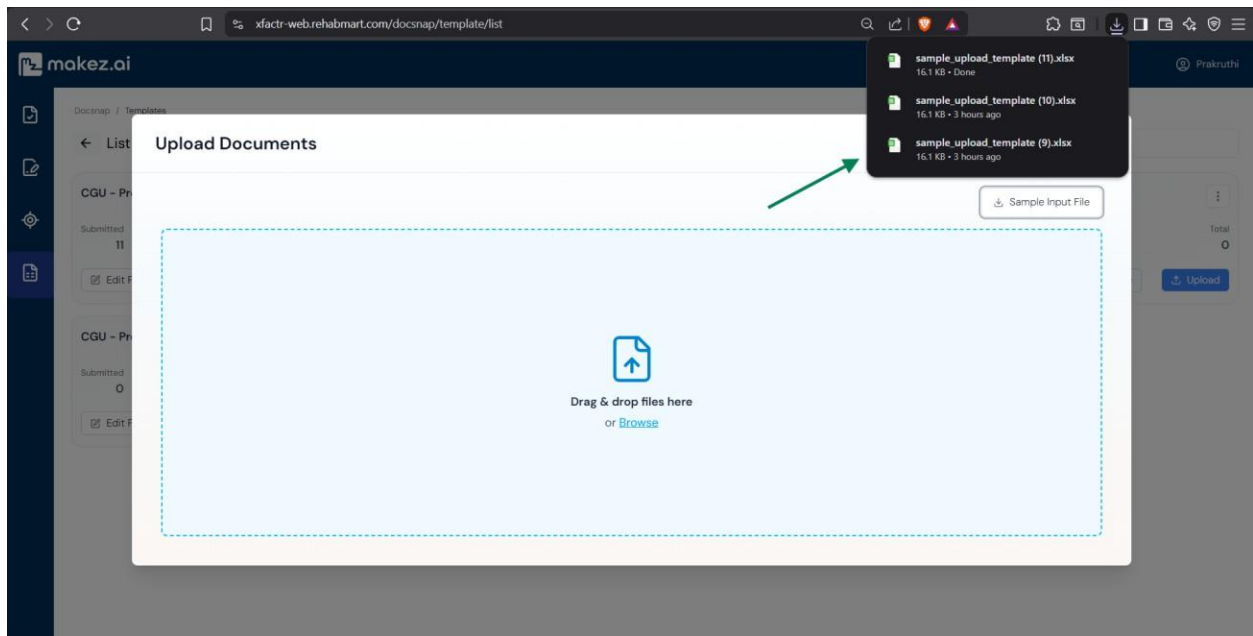

Steps to Upload a File:

1. Click the **Upload** button on the template card.
2. Select or drag and drop the appropriate file based on the provided **template**. For time being up to 5 product details can be uploaded.
3. Also, Users can download the **Sample Input File** from the Upload page to understand the required input format as shown in the below image.
4. Alternatively, the user can click the **Create** button and create a single blog by filling out the **Create Blog** form.

Does Red Light Therapy Work for Hair Loss? A Complete Guide to Red Light Therapy for Hair Growth

Can red light therapy help with hair loss? This is one of the most frequently asked questions in discussions and forums dedicated to hair restoration. The short answer is yes—red light therapy for hair loss does work, and the science backs it up. Research from Stanford Medicine and numerous clinical studies, including findings published in PMMC on the hair growth promoting effects of 650 nm red light, demonstrate that this non-invasive treatment can stimulate hair follicles and promote regrowth.

If you're experiencing thinning hair or pattern baldness, understanding how red light therapy works and which devices deliver the best results can help you make an informed decision. This comprehensive guide explores the science behind red light therapy for hair growth, explains how it works at the cellular level, and showcases the best red light therapy devices available to help you combat hair loss effectively.

Red Light Therapy for Hair Loss: How Does It Work?

Red light therapy, also known as low-level laser therapy (LLLT) or photobiomodulation, uses specific wavelengths of red and near-infrared light (typically between 630-850 nm) to penetrate the scalp and stimulate cellular activity. According to dermatologist insights and medical professionals, the mechanism works through several biological pathways:

- **Increased ATP Production:** Red light stimulates mitochondria in hair follicle cells, boosting adenosine triphosphate (ATP) production, which provides energy for cellular repair and growth.
- **Enhanced Blood Circulation:** The therapy improves blood flow to the scalp, delivering more oxygen and nutrients to hair follicles.
- **Reduced Inflammation:** Red light therapy helps reduce scalp inflammation and conditions that can contribute to hair loss.

7. Submit option

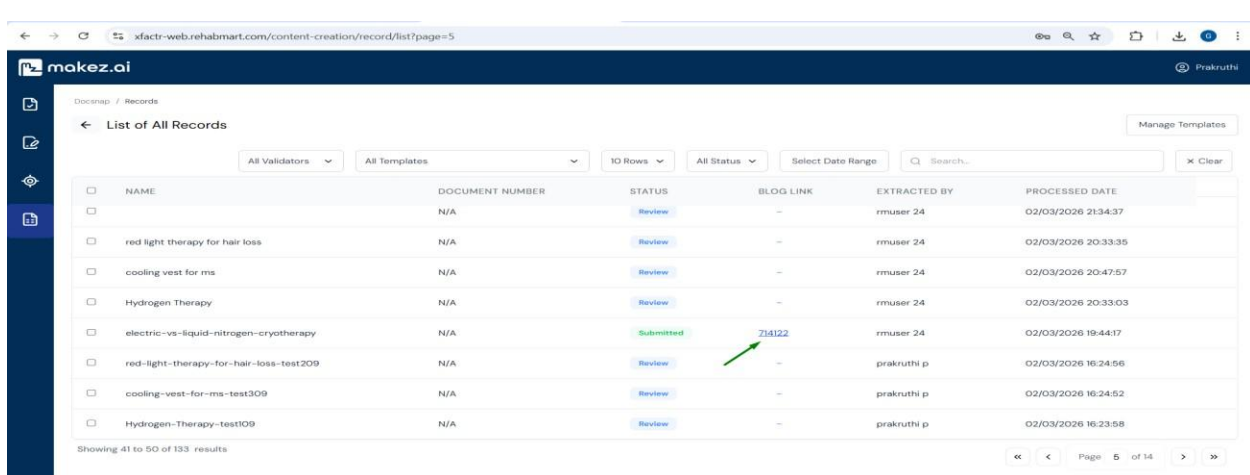

Once the review and edits (if any) are completed, the user can finalize the process by clicking the **Submit** button. After submission, the user can view the blog on the **Rehabmart** website.

Steps to Submit:

1. Open the file with status **Review**.
2. Verify that all information is accurate.
3. Click the **Submit** button to post the blog in rehabmart.
4. Once the blog is submitted, a link will be generated. By clicking on the link, the user can view the submitted blog on the system.

The screenshot shows the 'Content Preview' interface for a blog titled '8 Best Floor Beds for Adults After a Fall: Safety Guide for Seniors'. The preview includes a sub-headline 'Height-Adjustable Reclining Floor Bed, Descend Ultra-Low Bed, Empress Accora Floor Bed, Human Care Floorline Low Bed' and an image of a floor bed. On the right, the 'Content Details' panel shows the title, primary image URL, and a 'Submit' button.

The screenshot shows the 'makez.ai' Records page with a table of records. A green arrow points to the 'Submitted' status of the record 'electric-vs-liquid-nitrogen-cryotherapy'.

8. Edit Prompt

The **Edit Prompts** feature allows users to modify prompts so they can provide additional instructions to the AI and guide it to generate the desired output. This helps users refine the content generation process and ensure that the output aligns with their specific requirements and preferences.

Navigation Steps:

- Click on the **Edit Prompt** button on the template.
- The **Edit Prompt** page will open.
- Inside the **Prompt Page**, you will find options to **edit**, **copy**, and **reset** and **save** the prompt.

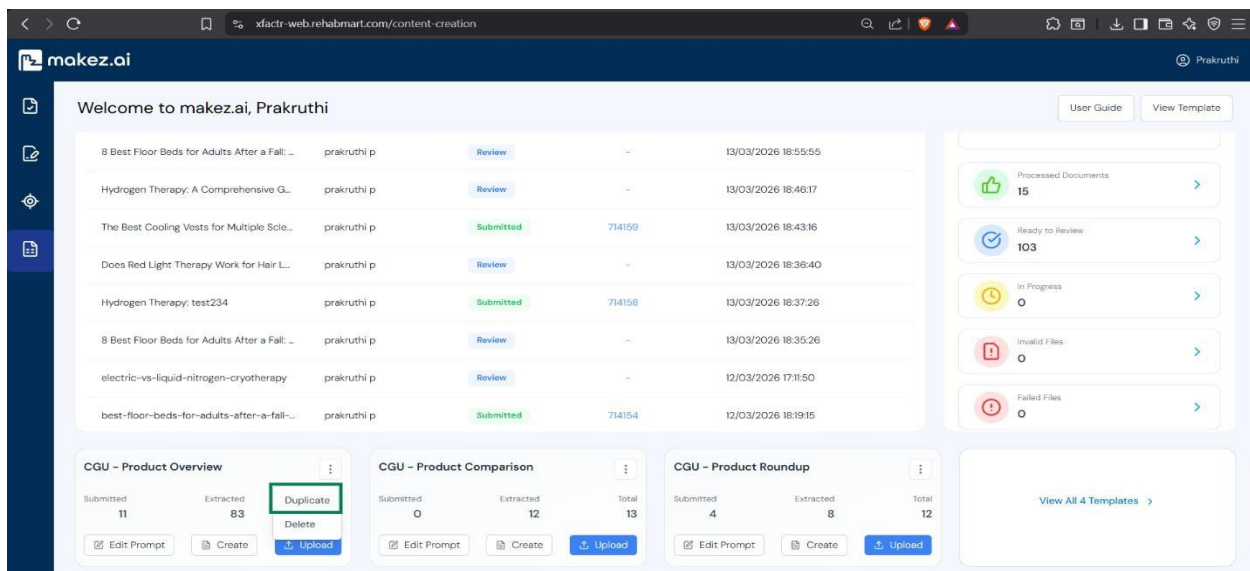

9. Duplicate button

The **Duplicate** blog template feature allows users to create a copy of an existing template. This helps users quickly adopt new blog categories such as **OT Show** or **PT Show** without creating a template from scratch.

Steps to Create a Duplicate Template :

1. Click on the **Kebab Icon (⋮)** menu on the template.
2. Select the **Duplicate** option.
In the **Duplicate Template** pop-up, rename the template name and click the **Create** button.
3. Once the user clicks the **Create** button, a new template will be created, as shown in the screenshot.

10. Regenerate Blog Content

The **Regenerate Blog** feature allows users to regenerate the blog content by selecting/deselecting the keywords. Based on the selected keywords, the system will regenerate the blog to better match the desired content and context.

Steps to Regenerate a Blog :

1. Inside the **Blog Review Page**, select or deselect the keywords as shown in the image.
2. Click the **Regenerate** button located near the **Submit** button.

Once the user clicks the **Regenerate** button, the system will regenerate the blog based on the selected keywords, as shown in the screenshot.

The Best Cooling Vest for MS: Top Cooling Products for Multiple Sclerosis Heat Intolerance

For individuals living with multiple sclerosis, heat sensitivity can significantly impact daily function and quality of life. A **cooling vest for MS** and other **cooling products for multiple sclerosis** have become essential tools in managing heat intolerance. Research shows that **cooling garments restore MS function** by helping regulate body temperature, allowing individuals to maintain activity levels and independence. This comprehensive guide showcases **the 10 best cooling vests for multiple sclerosis MS** and related cooling products that can make a meaningful difference in everyday living.

Whether you're looking for **cooling for multiple sclerosis and heat intolerance** or exploring **multiple sclerosis cooling vest options**, this guide provides detailed information about popular products that have helped countless individuals manage their symptoms. From full vests to cooling accessories, these solutions offer practical support for maintaining comfort and function throughout the day.

Understanding Cooling Products for MS

Heat sensitivity affects approximately 60-80% of people with multiple sclerosis, causing temporary worsening of symptoms known as Uhthoff's phenomenon. When body temperature rises, nerve signal transmission can slow down, leading to increased fatigue, weakness, and other MS symptoms. **Cooling vests improve 6-minute walk test performance** and overall functional capacity by maintaining optimal body temperature.

The **best cooling vests for MS** work through various mechanisms including evaporative cooling, phase-change materials, or ice pack inserts. Organizations like the MSAA offer a **cooling products program application** to help individuals access these essential items. Many people ask **"how do I get a free cooling vest?"** and the answer often lies in grant programs and assistance from MS organizations that recognize the importance of these therapeutic tools.

11. SEO Keywords Generation

This feature enables users to review, modify, and enhance AI-generated keywords, as well as add custom keywords based on their specific requirements. The final blog content is generated using the selected SEO keywords.

Steps for SEO Keyword Generation :

1. Click the Upload button on the template card.
2. Select a file or drag and drop it into the upload area.
3. The system will automatically generate SEO keywords based on the uploaded file.
4. Users can review and select or deselect keywords as per their preference.
5. Users can also add custom SEO keywords to better align with their requirements.
6. After finalizing the keywords, users can:
 - Generate blogs individually, or
 - Generate multiple blogs at once by clicking the Proceed All button.

The screenshot shows the 'makez.ai' content creation dashboard. At the top, there's a 'Welcome to makez.ai, Prakruthi' message. Below it is a table titled 'Recent Contents' with columns: Name, Document No., Extracted By, Status, Blog Link, and Completed On. The table lists several documents, mostly with a 'Review' status. To the right of the table is a 'Quick Summary' sidebar showing statistics: 141 Total Documents, 20 Processed Documents, 121 Ready to Review, 0 In Progress, 0 Invalid Files, and 0 Failed Files. At the bottom, there are four template cards: 'CGU - Product Overview', 'CGU - Product Comparison', 'CGU - Product Roundup', and 'Andrea Test Template'. Each card has a table with 'Submitted', 'Extracted', and 'Total' counts, and buttons for 'Edit Prompt', 'Create', and 'Upload'. A green arrow points to the 'Upload' button on the 'CGU - Product Overview' card.

The screenshot shows the 'Bulk Import' modal window. It has a title bar with 'Bulk Import' and a close button. Inside, there's a large light blue area with a dashed border. In the center of this area is a document icon with an upward arrow and the text 'Drag & drop files here or Browse'. In the top right corner of the modal, there's a button labeled 'Sample Input File'.

Living with **multiple sclerosis (MS)** often means dealing with heat sensitivity and heat intolerance that can significantly impact daily activities. When body temperature rises, many MS patients experience a temporary worsening of symptoms → a phenomenon known as Uhthoff's phenomenon. Fortunately, **cooling vests for MS** and other **cooling products for multiple sclerosis** have become essential tools for managing these challenges and maintaining quality of life.

Research shows that **MS patients using cooling vests show significant** improvements in mobility, energy levels, and overall function. These innovative **cooling garments restore MS function** by helping regulate body temperature, allowing individuals to participate more fully in work, exercise, and social activities. Whether you're looking for **cooling vests and products for MS** or exploring **active and passive cooling garment options for persons with MS**, this comprehensive guide will help you find the perfect solution.

Understanding Cooling for Multiple Sclerosis and Heat Intolerance

Heat sensitivity affects approximately 60-80% of people with MS. Even a slight increase in core body temperature—as little as 0.5 degrees Fahrenheit—can trigger symptom flare-ups including fatigue, weakness, blurred vision, cognitive difficulties, and balance problems. This is where **cooling for multiple sclerosis and heat intolerance** becomes crucial.

Cooling garments work through two primary mechanisms: **active cooling** (using ice packs or phase-change materials) and **passive cooling** (using evaporative technology). Both methods have proven effective, and many MS patients find that having multiple cooling options for different situations provides the best results. Organizations like the MSAA (Multiple Sclerosis Association of America) recognize the importance of these products, with many **cooling products MSAA** programs helping patients access these life-changing tools.

Why Cooling Products Matter for MS Patients:

- Reduce temporary symptom worsening caused by heat
- Improve exercise tolerance and physical activity levels
- Enhance cognitive function and mental clarity
- Support independence and aging-in-place goals
- Enable participation in outdoor activities and social events

12. Title Generation

The **Title Generation** feature allows users to generate additional blog titles using AI. Users can customize the output by selecting the tone, number of titles, and providing additional instructions. Based on these inputs, the AI generates relevant title suggestions.

Steps to generate titles :

1. On the **Content Preview Page**, click the **Generate more titles** button.
2. In the dialog box, select the desired **tone**, choose the number of titles, and optionally provide additional instructions.
3. Click the **Generate more titles** button.
 - Either a **tone** or **additional instructions** must be provided; otherwise, the button will remain disabled.
4. The AI will generate titles based on the selected inputs and display them for selection.

Once generated, users can choose a suitable title from the list.

13. Edit Selected Content with AI

The **Edit Selected Content with AI** feature allows users to modify a specific portion of the generated blog using AI. Users can select a section of content and provide instructions to regenerate or enhance that selected content.

Steps to generate titles :

1. On the **Content Preview Page**, click the **Generate more titles** button.
2. Click the **Edit with AI** button that appears above the selected content.
3. In the dialog box:
 - The selected content will be displayed on the left side.
 - Enter your instructions in the text box provided on the right side.
4. Click the **Edit with AI** button to regenerate the selected content.
5. Review the updated content in the preview section of the dialog box.
6. Choose one of the following options:
 - Click **Accept** to apply the changes to the blog.
 - Click **Discard** to reject the changes.

Once accepted, the regenerated content will be updated in the blog.
